

The ACATECH Support Specialist Inc. Timeline

2009

Mr. Jonathan S. Palma to assist Filipino aircraft technicians and engineers who lost their jobs abroad preceding the 2008 global economic crisis. To help fellow Filipinos affected by the recession, Mr. Palma built a connection between local prospective employers and these jobseekers as they wait to re-enter the labor market overseas when the economy bounces back.

As a start, ACATECH provided manpower support services and technical consultancy to aviation companies in Philippines. Fast-forward two years, Mr. Palma expanded ACATECH's services by offering post-graduate training courses to increase competitiveness of their aircraft technicians in the interest of adding value to their existing clients and winning new ones as well. Armed with an expert team to conduct technical training while utilizing its own Boeing 737-200 aircraft, Mr. Palma's vision to provide affordable yet quality industry training came to life. ACATECH provided graduates of different aviation schools in the Philippines high-caliber training while practicing manufacturers and airlines accepted standard practices in order to produce work ready technicians for the industry.

2012

ASSI opened its doors in the design and production of aircraft instructional training aids to assist aviation schools in their requirements with the Civil Aviation Authority of the Philippines (CAAP) and elevate the standard of aviation training using FILIPINO DESIGNED instructional aids and training equipment to be at par with other Asian countries. With the desire of Mr. Palma to extend the realization of his dreams, he thought of opening ACATECH Aviation Colleges to the cities of Baguio, Nueva Ecija and Cagayan De Oro City with the intention of bringing education closer to the public.

2016

ACATECH Aviation College ventures its way to Papua New Guinea to assist local students to study in the Philippines to train and develop future Aircraft engineers and instructors in preparation for the establishment of an aviation school and aviation support company within Papua New Guinea.

After knowing that there are Papua New Guinean citizens studying in Philippines, Civil Aviation Authority of Papua New Guinea finally welcome its doors to ACATECH Aviation College last May of 2018 and was recognized to be a CASA Approved Maintenance Training Organization with MTO Certificate 141/001 to offer 36 months comprehensive training under CAR Part 66 also known as Diploma in Aircraft Maintenance Engineering and Diploma in Aviation Electronics Engineering. At the same date, AAC PNG was given recognition by Department of Higher Education, Research, Science and Technology (DHERST).

The ACATECH Support Specialist Inc. Timeline

2019

ACATECH paved its way in PNG by opening a branch in the country's capital city - Port Moresby. Now accepting students for March 2021, in view of the demand for quality training in the area of Aircraft Maintenance, ACATECH is set to educate leaders of the future in an environment that endeavors challenge and support by providing adequately-trained course instructors from the Philippines, advanced training equipment and well-maintained facilities.

ACATECH is now set to accept students not only in Diploma Courses in Aircraft Maintenance and Avionics, Type-Rating Courses for Airline Operators such as Boeing 737 NG, ATR 42/72, DASH 8, Q300/400 but also Commercial Private Pilot and Commercial Pilot License courses approved by CASA PNG.

ACATECH is also the only company in PNG that incorporates Engineering, Flight Training and Repair Facility (CASA Part 145 Maintenance Organization) all into one. It is also in the process of applying for its Air Operator Certificate this 2021 to operate Part 135 operation.

ACATECH believes that by using its expertise and experience in technical training, industry practice, research and development it will produce world-class professionals that will assist the government in its national development.

2020

In July 2020, ACATECH Support Specialist Inc ceased its operations due to the decrease in demand for aviation services caused by the COVID-19 pandemic. The company was forced to close down as it was no longer financially viable to continue its operations. Despite efforts to adapt to the changing circumstances, the impact of the pandemic was too great to overcome. The closure of ACATECH Support Specialist Inc is a reflection of the challenges faced by many businesses in the aviation industry during this unprecedented time. The company regrets any inconvenience caused to its clients and employees and hopes for a speedy recovery of the industry.
